

How to use:

- Print, cut, and laminate to make the cards into a game
- Assure you're being flexible with responses (i.e., if the client responds with "chef" to "Who works at a restaurant?" this is correct, even if it's NOT what is on the picture card)
- Make sure you have a generalization plan for the client to generalize responding to WHO questions outside of the context of cards!
- Check back our site (www.behaviorfy.net) for updated materials and free resources!
